INTRODUCER AND PERFORATOR GUIDE FOR PLACING A TAPE IN A HUMAN BODY

ABSTRACT:

The device for placing a reinforcing tape (4) in a tissue of the human body comprising an introducer (1), has:

- an elongated flexible body (2),
- at each of both ends of the body, pulling means (5),
- 5 ▪ between both ends, a cavity (3) for receiving the tape (4),
- and, at the cavity, means for cutting (7) the body (2) into two portions separable by pulling exerted on the pulling means (5).

10 According to the invention, the device is characterized in that the cutting means (7) comprise at least one aperture provided in the wall of the cavity (3) and intended for the passage of a cutting tool.

Application to the treatment of cystoceles.
